

CONTROLLED PERCOLATION SYSTEMS FOR HEAP LEACH MINING

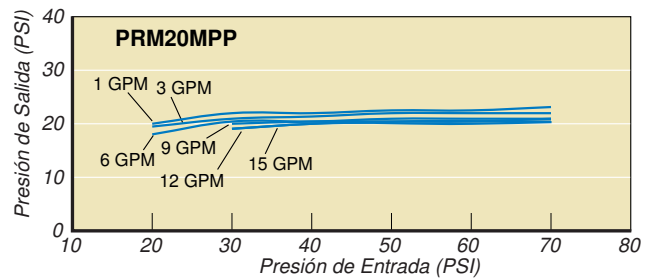

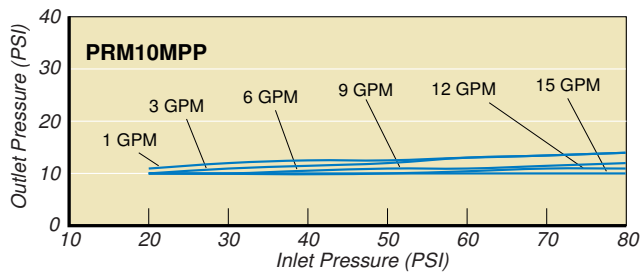

# Pressure Regulator

Ore'Max® Pressure Regulator offers a unique advantage over other regulators. Consistent, reliable performance in the field, coupled with rugged, corrosion resistant construction for long life, makes the Ore'Max Pressure Regulator the premier choice for mining and heap leaching professionals.

Unique design elements mean superior performance without flutter, water hammer or excessive downstream pressure fluctuation. The chamber vent design allows for direct burial installation, allowing greater system design flexibility and reduced maintenance or loss. Special construction materials are specifically designed for use with heap leaching solutions.

## CONTROLLED PERCOLATION SYSTEMS FOR HEAP LEACH MINING

# Specifications

## Specifications

Inlet: 3/4" Female Pipe Thread  
 Outlet: 3/4" Male Pipe Thread  
 Operating Flow Range: 0.1 GPM - 15 GPM  
 Maximum Operating Pressure: 150 PSI

Available pre-assembled with tube and emitters for side slope applications.  
 May be used on all surface emitter lines in both new and old installations.
